Mobile Website

Stewart & Watson recognise the significant use of mobile technology in our daily lives are delighted to announce the launch of our mobile website, developed for a variety of mobile devices.

This application provides visitors with a quick and easy tool to search for properties for sale or rent on your mobile device and is proving a great success with over 2,000 visits in the first three months.

Our bounce rate – the number of people who visit the homepage and then view other pages within the site rather than leave the site – continues to be well below industry average, meaning that visitors find what they are looking for.

Simply access our website on your mobile device and you will be directed to our mobile website.
